Subject: RE: PROPOSE: general format for Vienna Water Filtration system

See below language from SEMD (in blue)...

Also, SEMD is going to meet next Monday (only time available) to discuss if they can answer questions about showering, washing dishes, laundry.

Subject: PROPOSE: general format for Vienna Water Filtration system

Roger, per our discussion about what to cover- I jotted down some notes as you spoke. I don't expect this needs to be longer than several paragraphs (bulleted actions if many actions to list).

Sasha- please note in yellow highlight one line of context to distinguish ECAD and SEMD's work on this.

Subject:
Vienna Water Filtration System- PFOA/PFAS

Current status:

Ex. 5 Deliberative Process (DP)

Ongoing EPA action continues at the Vienna TCE Superfund site, where EPA is (CURRENT ACTION/STATUS OF SUPERFUND SITE). SEMD has an NPL Site in Vienna WV. The PFAS/GenX contamination in drinking water in the area of Vienna is due to the Washington Works Chemours Plant located directly across the Ohio River, not the Vienna NPL site, which is a dual dry cleaner site. The Vienna PCE Site is located in the heart of Vienna, and these residents are drinking public water, not bottled water. There is an ordinance prohibiting the drilling of new private drinking water wells in Vienna. Water Division and ECAD have been addressing contamination associated with the Washington Works with a SDWA Order.

Background:

Contamination characterization related to the site.

Health advisory issued by EPA in January XXXX.

Once health advisory issued, Chemours took immediate action, installing XYZ filtration system.

Permanent treatment installed.
